

# Syrinx Mini

Syrinx system data collector from EAP, accepts only 1 EAP (for small size installations). Manages data, saves them in a shared folder or internal memory, makes them available for the FridgeLog Z software, manages out of limits alarms. Syrinx Mini may have a different look than the one showed in the picture.

The ZED radio modules send data to the EAP (Ethernet Access Point) receivers connected to the local network and these send data via Ethernet to the collectors called Syrinx. Data are displayed on the FridgeLog Z software that can be installed on more than one PC in the same network as data are shared.

## Main features

### Accessories

- USB modem
- EAP Ethernet access point

## Technical specifications

Cable	Included
Alarms	Email, SMS (with ZED IT and Syrinx system only)
