

DLHT software management data logger temperature and humidity

The DLHT software is the management program for the DLHT temperature and humidity data logger and is compatible with the 21 CFR Part 11 regulation. Data are saved per serial number of the data logger and are appended one after the other. Therefore it is particularly indicated for continuous monitoring of rooms, fridges and cells especially in the pharmaceutical and medical fields.

Main features

- Programs and downloads data from the DLHT dataloggers
- Multiple user access with login and password
- Shared database
- USB hardware protection key for data security
- Templates creation for quick mission starting
- Data graph with zoom and print
- Recorded data table
- Report printing with mission information, graph and table
- Compatible with FDA 21 CFR part 11 regulation
- Multilanguage: italian and english

The system

DLHT system is made up by:

- DLHT data logger
- DLHT software (32 bit systems only)

Accessories

- E-Log Alarm

Technical specifications

Operating systems	Windows XP, Vista, 7 (32 bit)
Data management	Database organized on data loggers' serial number (unique for each) and description (customizable).
Data display	Graph with zoom, table, printed report with all data, graph, statistics
Customizable parameters	Acquisition step, max and min limits
Regulation compatibility	FDA 21 CFR Part 11
Languages	Italian, English
