

# E-Log Alarm

The E-Log Alarm software, that works in background, reads the data acquired by the DLHT connected via USB to the PC itself and, when the thresholds sets with the DLHT software are overpassed, the E-Log Alarm sends an alarm email to the given addresses.

Available alarms are:

- Values out of thresholds
- Alarm called off
- Low batteries
- Communication stopped

## Main features

### Plus

- Constant control on temperature and humidity
- Immediate email alarm of data out of thresholds or data back within thresholds
- Data are stored in the memory of the DLHT anyway
- 21CFR Part 11 compliant software (DLHT)

## The system

E-Log Alarm system is made up by:

- DLHT data logger
- DLHT software (32 bit systems only)
- E-Log Alarm software

## Accessories

- DLHT software management data logger temperature and humidity

## Technical specifications

Operating systems	Windows XP, Vista, 7 (32 bit)
Data loggers supported	DLHT
Functions	Email alarm sent when the DLHT connected via USB to the PC records data out of thresholds
Customizable parameters	All email parameters can be set (POP, SMTP, login, password). Alarms can be sent to multiple addresses.
Languages	English
