

EAPL Ethernet Access Point Lite

Ethernet Access Point Lite, radio receiver for ZEDs. It is possible to connect more than one EAPL. Each EAPL creates its own radio network and can manage several ZEDs, configured for the same radio network. It is configured through web pages.

The ZED radio modules send data to the EAPL receivers connected to the local network and these send data via Ethernet to the collectors called Syrinx. Data are displayed on the FridgeLog Z software that can be installed on more than one PC in the same network as data are shared.

Accessories

- Syrinx L
- Syrinx desktop
- FridgeLog Z
