

## Wall support mounting for DeepWave Node

**The kit includes:** the triangular support, screws + anchors for fixing, metal rod with double-sided adhesive.

- Apply the metal rod with double-sided adhesive on the battery compartment door of the DeepWave Node as shown in the figure.

- Use the wall support as a template for drilling holes in the wall. Fix the support using the wall plugs and screws.

- When you fix the DeepWave Node on the support pins, press gently without forcing. Match the metal rod applied on the Node to the magnet of the support.
